

Where's your next bad day coming from?

COLLECTION

Stop overpaying for mowing.

Don't leave your drivers in the dark.

Keep roads safe with stable slopes.

Eliminate guessing games in your asset management with robust data and resources. Contact PILLAR to back your asset management with our cost-effective and powerful data collection.

\$1.2
Million Saved
Annually

Cut mowing cost creep and save millions.

Cost creep doesn't have to be part of doing business. PILLAR helped a DOT save \$1.2 million annually through our Collection expertise. Get clear about your mowing acreage and cut costs with regular assessments.

100,000 +
Signs Collected

Don't let confusion keep drivers in the dark.

Send strong signals with fresh signage. Faded and missing signs aren't just unsightly, they're dangerous for drivers. PILLAR aided a DOT to inventory over 100,000 signs for identification and program replacement for faded and missing signs.

15,000 +
Sq. Yd. Slope
Stabilization

Eradicate unstable slopes.

Slope slides can be deadly which is why stabilization is priority #1. PILLAR has worked to implement slide prevention by identifying over 15,000 square yards of slopes to be stabilized.

ASSESSMENT

Make pipe failure a thing of the past.

Stop overgrowth emergencies before they start with proactive maintenance.

Ensure guardrail compliance to protect motorists.

Proactively manage risk in your aging infrastructure. Learn how PILLAR leverages technology and expertise to evaluate, analyze, and assess your data to unlock its full potential.

20,000 +
Pipes Inventoried
and Assessed

Don't let rotting pipes block productivity.

Unexpected pipe failure is expensive and dangerous. Stay in front of potential emergencies with proactive assessment. PILLAR partnered with a DOT to assess over 20,000 pipes for safety and cleaning protocols to avoid future pipe failure.

2,350 +
Miles of Guardrail
Assessed

Tackle guardrail compliance and reduce deadly risk.

Wrong heights, damaged rails, and frankensteined end treatments pose a fatal risk to drivers. PILLAR worked with a DOT to assess the safety and compliance of over 2,350 miles of guardrail to swiftly correct issues.

500 +
Centerline Miles
Assessed

Evade overgrowth emergencies.

An out-of-sight, out-of-mind approach can mean huge out of pocket expenses. Tame vegetation overgrowth with proactive roadside maintenance. PILLAR helped a DOT address over 500 centerline miles and corresponding ramps and intersections for overgrown trees and vegetation to make roadways safer for the traveling public.

PLANNING

Banish reactive work schedules and get more done.

Cut through the noise and solve problems fast.

Don't let insurance claim funding slip through your fingers.

Find out how PILLAR helps you power your operation with tailored plans and solutions so you can secure funding, meet regulations, and achieve your goals.

2,300 +

**Drop Inlets & Pipes
in 4 months**

Take control of your work schedule.

Asset managers report that 80% of the job is crisis management and 20% is planning. But you can flip that ratio. PILLAR was contracted to identify, map, and prioritize known and unknown maintenance issues for drop inlets and pipe network through a 50-mile long urban corridor. The work and corresponding network mapping helped them justify maintenance budgets as well as safely contain a release of toxic liquid from a tractor trailer hazardous material spill.

Stay on track when you're short on people and time.

Get the job done no matter the challenge. PILLAR worked on a municipal trail project to collect and assess inventory to prevent asset failure, extend life and maintain level of service.

Get the insurance money you're owed.

Don't miss out on insurance recovery claims on damaged assets. Over the past 5 years, PILLAR has helped one DOT District collect over \$4.5 million in 3rd party damage claims so they can repair assets without breaking the bank.

One DOT District**

EXECUTION

Full-time experts without the full-time price tag.

Seamlessly manage contracts and quality control.

Boost your knowledge base with staff augmentation services.

Overworked and understaffed? Not with PILLAR on your side. Contact us to add experienced professionals when and where you need it most.

4
Full-Time
Technical Writers

Conquer your technical writing and contract development.

You don't have to stay buried in a backlog of paperwork, even if you don't have the budget for a new full-time staff member. PILLAR has 4 full-time technical writers available to step-in and write contracts and technical documents for you.

900 +
Combined
Years of Tactical
Knowledge

Stop struggling to manage contracts and quality control.

Finding time or qualified candidates to manage contracts and quality control doesn't have to be a struggle. PILLAR has a wealth of knowledge managing contracts and ensuring quality from contractors.

56,000 +
Hours Last Year in
Staff Augmentation

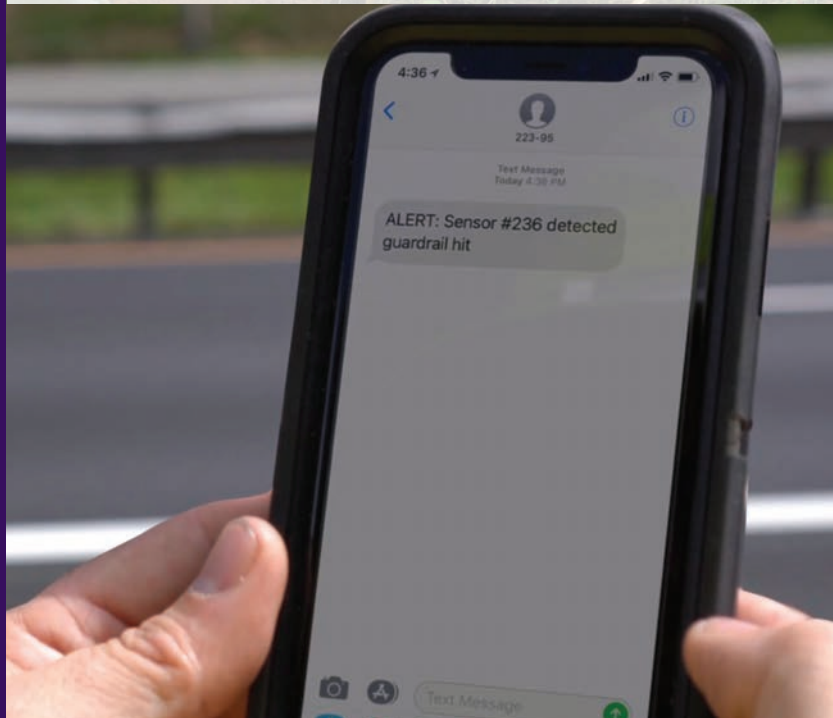

Combat skill gaps on your maintenance team.

Retirement, cutbacks, and hiring freezes can create chaos for operations and maintenance teams. PILLAR plugged the knowledge gap left vacant from losing senior employees for one DOT, enabling them to maximize available resources.

STOP BAD DAYS BEFORE THEY START

Speed through asset collection with PILLAR.

Shrink response time with instant alerts.

Maximize the lifecycles of your assets with PILLAR.

Take your asset management program from reactive to proactive with PILLAR.

Work smarter not harder with PILLAR.
